

PROFILE

I am 24 years old, I love the new technologies and learning how they can give value to upgrade our lives.

I like to define myself as an autodidact person, very motivated when facing new challenges and capable of adding value to a company's project with my same values and expectations.

SKILLSET

- **SOFTWARE DEVELOPMENT:**

C++, JavaScript, TypeScript, Vue.js, API development, Git, Python & SQL (MySQL, Snowflake).

Wide knowledge of Windows, Linux and macOS.

- **SOFT SKILLS:**

Positive attitude to resolve problems and goals, proactivity and teamwork.

EXPERIENCIE

WALLBOX CHARGERS | Full Stack developer in practices

SEP 2021 - MAR 2022

My main function in the team was to build a platform to monitor and operate the SIM cards allocated on some specific models of the company chargers for electric vehicles.

I created a tool in a private environment, VPN protected, so engineers and technicians of the company had a solid, well implemented solution to use in the field in real world.

The implementation was as in follows::

- Develop and implement a custom *Backend* with Typescript, so it was possible to consult info and operate with the SIM operations related options.
- Once the *Backend* was developed, I started working on the implementation of a *Frontend*, that was flexible enough to adapt to the team necessities, and could evolve meeting the solutions needed in the future, so the code was meant from beginning to be scalable. The technology chosen was Vue.js
- During the process on the *Full-stack*, I used Software Engineering techniques such as AGILE methods and frequent "One to one's with" the product owner's and project managers to make sure that the project fitted all necessities.

UPC (ESEIAAT) | IT technician

SEP 2019 - AUG 2021

During this period I worked in the IT department of the university I was studying in.

It was a great way to combine my studies while I started working on a real enterprise environment.

My tasks were the following:

- Maintenance and actualizations of the TIC and audiovisual equipment.
- Resolving problems and attending the customers.
- IT and multimedia equipment budgeting and shopping.
- Inventory and organization of products.

ESTUDIS

BACHELOR'S DEGREE IN TECHNIQUES FOR SOFTWARE APPLICATION DEVELOPMENT | UOC (100% in ENGLISH)

OCT 2023 - NOW

DEGREE IN ENGINEERING OF AUDIOVISUAL SYSTEMS | UPC (ESEIAAT) (NOT ACCOMPLISHED)

SEP 2017 - MAR 2023

NON-TECH RELATED EXPERIENCE

BBVA/CaixaBank | Bank worker

JUN 2022 - FEB 2023

My job during this period were as a cashier and client manager.

The main tasks were:

- Cash management on ATMs and customer quotidian operations.
- Countability and management of the basic equipment needed to operate cash on a bank branch office. (Cash recycler, safe, ATMs...)
- Assessment on selling financial products, credit cards and insurances.

CAMPING PONT D'ARDAIX | Waiter on the camping restaurant

WEEKENDS, HOLIDAYS, SUMMERS ETC. (TEMPORARY CONTRACTS OCCASIONALLY)

My main function was to attend the dinning room and the bar of the local. Here I was able to develop my social skills to deal with customers face to face and the typical basic skills needed for the services sector:

- Check in with the customers and attending them to enter the local and sitting them in their table.
- Conditioning of the installations with the order needed to fit the safety and cleaning standards, taking care of the restaurant installations and material.
- Attending to all assigned tables with a polite, clean and ordered service, having the customer happy and comfortable attending their special requirements and preferences.

ESPORA RESTAURANT | Waiter on the dinning room

MAY 2023 - OCT 2023

My function was to attend on the dinning room of the restaurant and occasionally on the bar. As this was my second approach in this type of job, I had the opportunity to upgrade my skills and knowledge learned before.

My tasks were the same as in the previous experience in the "CAMPING PONT D'ARDAIX".

MAS PAGÈS GOLF | Leisure teacher

SUMMERS BETWEEN 2017-2019

During the summer seasons, I was working as a leisure teacher on a golf summer camps. During these periods, I did the following tasks:

- Golf teacher for the kids, getting them involved in interactive activities, given that in most cases, this is the first approach they had with this sport
- In charge of a group of around 10 kids, attending the specific needs of every kid.
- Creation and execution of activities in group with all kids on the camp.
